Many health care providers, at some point in their careers, find themselves exhausted and depleted, sometimes with related chronic conditions. Often the answer lies not only in the techniques we employ, but also in our fears, desires, and intentions. This workshop is focused on self empowerment through identifying and removing the physical, cognitive, and energetic barriers to abundant vitality. We will also explore protocols for applying the Infratonic in orthopedic, recovery, and cognitive applications.

**Objective:** Every attendee will experience immediate and ongoing, measurable increase in vitality, to build health, and be more able to share vitality and joy with others.

**Who Should Attend:** Those who find themselves depleted from regular patient/client contact or environmental sensitivities, those who seek to better understand the nature of vitality, and those who wish to learn protocols for application of the Infratonic 8.
