

CHI®

shield

Welcome to the CHI tribe!

Thank you for the purchase of your CHI Guard! This device is designed to improve the quality of your driving (Auto), home (Home), or general (Shield) experience.

WHAT PROBLEM DOES THE CHI GUARD FAMILY SOLVE?

Automobile combustion, agricultural burning, and forest fires are the root cause of oxidative pollution at ground level (the ozone layer does a fine job at protecting us from the “higher level” oxidative pollution, but that’s another story).

Many common effects of this oxidative pollution we see are:

- headaches & migraines
- irritability & anger
- chronic disease
- EMF hypersensitivity
- chronic illness
- anxiety & pain

HOW TO USE THE...

CHI SHIELD

Wear pendant around neck, keeping the “shield” at mid-chest level.

CHI GUARD (AUTO)

Plug the CHI Guard Auto device into your vehicle’s car charger.

CHI GUARD (HOME)

Plug the CHI Guard Home device into a home outlet (preferably one closest to areas of the home with several cords or main power outlets – i.e. near hub where electrical devices reside, office, TV room, internet area, etc.)

HOW CAN THE CHI GUARD HELP ME?

Our customers have reported the following benefits:

- Improved concentration while driving
- Reduced headaches
- Increased alertness during long drives
- Elimination of headaches
- Reduced irritability & stiffness
- Increased mental clarity

IF I LEAVE MY CHI GUARD AUTO PLUGGED INTO MY CAR, WILL IT DRAIN MY CAR'S BATTERY?

No. Even if your vehicle allows you to use its charger while the vehicle is turned off, the vehicle will turn the charger off after an allotted period to ensure its battery lasts as long as possible.

HOW MANY SQUARE FEET DOES MY CHI GUARD HOME COVER?

While we have yet to discover the exact amount of area the CHI Guard Home covers, we have found it to be effective up to 1200-1600 sq ft.

CAN I USE MORE THAN ONE CHI GUARD IN MY HOME?

Yes. You cannot overuse the CHI Guards, nor can you use too many at one time. If you will be using more than one CHI Guard Home, consider one at ground level near where the power enters the house and the other at the

opposite end of the house on the top floor (if you live in a one-story house).

This is because the extensive wiring in a large home can act as an antenna, collecting ionizing potential from a polluted environment.

CAN I GET MY CHI SHIELD WET?

Yes, however, the leather strap that comes with the CHI Shield is not recommended for water. If you have a favorite material you'd like to replace the leather strap with, making the switch is easy and you can wear the CHI Shield all the time!

CHI STONE

This device is designed to improve your traveling experience, outings of all kinds involving crowds, and overall mood when handling stressful and frustrating situations.

Whether recovering from jet lag, emotional frustration from driving in traffic, or sickness during travel, the

CHI Stone helps alleviate these challenges. When the body has been drained of much of its overall energy – or vitality, as we say – things like colds, irritation, anxiety, and exhaustion often come into play. With the help of the Stone, these problems are gently and swiftly solved.

Visit our website to learn more about our mission to provide tools that empower the tribe to enhance the human experience by questioning the norm.
