

# Equitonic 9<sup>®</sup>

sound  vitality

# Benefits

---

The Equitonic 9 dispenses safe, ultra-low sound wave frequencies that penetrate the deepest layers of the body's tissue to dissolve cellular trauma and speed up the natural healing process.

## Benefits

- Promotes calm and clarity
- Decreases recovery time from inflammation and surgery
- Increases hyaluronic acid production
- Enhances sleep quality and relaxation
- Provides relief from chronic pain and stress
- Heightens athletic performance

## Equitonic 9<sup>®</sup> Basic Operation

- 1. Charging**—When you need to charge the Equitonic 9 (E-9), and whenever the red LED **(1)** blinks (indicating the battery is low).
- 2.** Plug the charger into any socket (100-240V) and into the E-9 at point **(5)** for 1.5 hours for a full charge, which will provide up to 45 hours of operation. The red LED will turn to yellow then green when fully charged.
- 3. ON/OFF**—Hold down the middle button **(2)** for 1 second to switch the E-9 ON or OFF.
- 4. Timer**—To select the desired timer function, push the left button **(3)** repeatedly until you find the desired setting:

10 Minute Light ON = Unit stops after 10 minutes

3 Hour Light ON = Unit on for 3 hours, off for 3 hours, then repeats

Alarm Light ON = Beep will sound after 10 minutes

5. **Signals**—To select between the three signals (4), press the right button until the desired light illuminates.

**Basic Treatment Guidelines**—Apply the E-9 to the whole body from head to hoof, focusing on points of pain or injury, stopping for several seconds on points, circling around joints and sore spots. The RESTFUL signal can also be applied by fixing it to the stall 5 to 10 feet away from the horse on the 3 Hr setting with the charger plugged in. The deep penetrating waves in all signals will work through blankets and casts, and the E-9 can be used over metal without risk of heating. If the signal seems too strong, especially at the beginning of the treatment, just move the E-9 a few inches to several feet away from the horse until you observe a relaxing effect, then approach slowly.

# Signal Description

**RESTFUL**—The Restful signal is for overworked horses to help relax and speed recovery of muscles, bones, and joints. It is also used to calm agitation or nervousness. Apply the E-9 to the body or mount to the stall wall or ceiling projecting toward the middle of the stall, and set it for the 3 Hr on/3 Hr off setting. Leave it on for a few days (batteries) or weeks (charger). This is very time-efficient therapy.

**ACUTE**—Apply E-9 to any issue. Start a few feet away to dissipate static tension. As the horse gets sleepy, apply to areas of pain or injury. Keep it moving, follow nerves and meridians, and circle around organs, pains, and joints. For colic, start near the head, follow the back, and gradually approach the belly. Apply to the belly. Go slow, expect results. For emotional issues like cribbing, nervousness, and weaving, etc., apply as above. Like a boil, the emotional issues may come to a head and release. Go slowly and follow what the horse may seem to enjoy.

**PRE RACE**—The Pre Race signal brings the horse to a state of calm, clear, and focused awareness. Approximately 30 to 45 minutes before the race, apply for 10 to 15 minutes (this will replace neurotic energy with inspired energy).

# Frequently Asked Questions

---

**-Can I use the Equitonic 9 too much?**

***No, you can use the unit for as long as you like without any adverse affects.***

**-Does the unit have to be touching the horse to be effective?**

***No, the unit can be effective up to 20 feet away.***

**-How does Equitonic Therapy alleviate pain?**

***Equitonic Therapy alleviates pain by reducing cellular trauma. Specifically, the therapy works by calming inflamed cells so they devote their energy and resources to healing rather than producing painful and often disruptive inflammation.***

**-What if I don't see immediate results?**

***Equitonic Therapy provides effective relief for most horses. Some experience instant relief, yet others experience results over a longer period of time-especially if their illness or injury has been cumulative or they have been dealing with chronic pain.***

# Specifications

|               |   |
|---------------|---|
| Treatment     | Equitonic Massager  |
| Frequency     | 8-800 Hz  |
| Battery Specs | 3.6V, 700mAh NiCd rechargeable battery  |
| Battery Life  | Up to 45 hours  |
| Charger       | 100-240V, 50/60 Hz, 9V  |
| Charging Time | 1.5 hours for full charge, automatically shuts off when charged. <u>For maximum battery life, charge only when the red light appears.</u> |
